PROFILE

I consider myself a problem solver, with a deep appreciation for a job well done. I am methodical and I like getting involved in complex projects.

Continuous personal development is a must for me, which is why I invest constantly in new courses and I strive to do personal projects, in order to better myself at what I do.

Respecting deadlines is a must for me. Honoring my promises always takes priority!

EXPERIENCE

OSF Global Services

2020 - Current

Intermediate Fullstack Software Developer

I currently do fullstack .Net Core development using Angular for the UI components (currently I know how to use DevExtreme and Material UI). I deal with high data volume processing and modifications on software financial systems, and also with supporting 3 systems, with a lot of customers using them.

OSF Global Services

2017 - 2020

Junior Software Developer

I did NodeJS backend application development, payment systems integration with Stripe, statistics automation and various optimizations.

Did planning according to the requirements I got from the customer, in order to meet the required deadlines.

Silicon Service

2016 - 2017

Junior Software Developer

I did C# WPF desktop application development and OpenGL ES application design.

Worked with video and audio codecs for embedded systems and have an understanding of how the OpenGL pipeline works.

EDUCATION

University of "Stefan cel Mare" Suceava

2013 > 2017

Bachelor in Automatics and Applied Computer Science

Participated in the school courses and seminars.

Also did several projects for embedded competitions and hackathons :

- computer control with haptic feedback

- smart electric car

- digital press kiosk, with interaction based on vocal and gesture recognition with Kinect

My thesis was an interactive advertising system, based on Kinect interactions via gestures.
